

Delhi World Public School, Noida Extension

Pre-nur to XI

URGENT and IMPORTANT

C.No.dwps/36/19-20

4th March'20

Dear parents

Greetings for the day!

With the Coronavirus making its appearance in Delhi & NCR, we would like to inform you of the following additional precautions that we as a school are already taking to reduce any possibility of acquiring or spreading of infection in the school premises.

- Fumigation of class rooms and school buses with ULV machine using Virex II (Diversey Product) as per the WHO advisory.
- Wiping of class room furniture with disinfectant solution twice a day as per the WHO advisory.
- Wiping of door handles, windows and surfaces with disinfectant.
- Regular mopping of the floor in the corridors and washrooms with disinfectant throughout the day.
- Frequent and thorough washing of hands with liquid hand wash for students, teachers and support staff.

Instructions have been given to all our teaching and non-teaching staff to take precautionary safety measures to avoid the spread of infection.

Guidelines for Parents:

- **With on-going examinations, we have been observing that children are being sent to school, even when they are down with fever, cold or cough. If your child is showing any signs of cough, cold or fever, you are requested to keep your ward at home and allow the infection to run its course. This will prevent others from being exposed to the infection.**
- **Parents are requested to send alcohol free sanitizers to school and encourage them to wear face masks and gloves.**
- **Children should be taught personal hygiene like covering the mouth and nose with tissue while sneezing or coughing.**
- **Do instruct the children to drink water to keep them hydrated.**
- **You are also requested to make your wards do at least three sets of long breathing exercises every morning**

We request your full co-operation and support in maintaining a safe and healthy environment for all our children.

Warm regards

Ms. Jyoti Arora

Principal
